

This **Comment** on the West Coast Governors' Agreement web site is from:

Name: Wayne W. Miller

State(s): California Oregon

Regarding Topic Areas:

- Habitat protection and restoration

New Suggested Topic: Wake up call. One of the largest issues is rampant development and isolation of shoreline ocean fronts by private construction and erosion of coastal regulations and protection.

Comment/Suggestion:

Coastal development of private construction is out of control and needs to be controlled. No development on ocean fronts is the only solution of protection, as history shows the negative impact of those developments.
